EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE SPECIFICATION

After the title of the invention on Page 1 of the specification, insert a new line as -
-This is a division of application Serial No. 10/083,686 filed 2/27/2002, now US PAT.
6,644,584--.

IN THE CLAIM

Cancelled the non-elect claims 2-5.

2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose the claimed invention. The closest reference, Goldsworthy et al. (US PAT. 3,701,489) teach a process of winding a single coil around a winding former in the directions of X-axis and Y-axis. However, the winding process of Goldsworthy et al: is that the coil is wound in the X-axis by rotating 360 degrees until the coil is wrapped a first planar surface and then the winding former is repositioned by 90 degrees in Y-axis with a plane perpendicular to the first winding position and rotating the winding former 360 degrees until the coil is wrapped a second planar surface of the

winding former. Therefore, Goldsworthy et al. fail to teach a process of winding a single coil around the winding former having a plurality of locks in the directions of X-axis and Y-axis by rotating 180 degrees sequentially while the coil is supplied in a direction of Z-axis. It is not obvious taken alone or in combination of other references fairly to suggest the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claim 1 is allowed.
